DETAILED ACTION***Drawings***

1. The drawings are objected to because the indicia used in Figure 1 is improper drawing content and drawing details as well as reference numerals and lead lines are of poor quality and difficult to read throughout the figures. Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1-3, 6-13 and 16-18 are rejected under 35 U.S.C. 102(b) as being anticipated by Rinard.

Rinard discloses a baffle assembly including side skirts 47 on both sides of the trailer body in front of rear wheels 33 thereof.

4. Claims 1-4, 8, 10-14 and 18 are rejected under 35 U.S.C. 102(b) as being anticipated by Shaffer.

Shaffer discloses the claimed invention including a baffle assembly 28 with mounting means 22 for mounting the baffle assembly 28 to the underside of the trailer body 12. The baffle assembly includes a wedge shaped skirt made up of two panels 64. Reference Figure 4.

Allowable Subject Matter

5. Claims 5 and 15 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
